The Problem

Mali, Sudan, occupied Palestinian Territories

• Multi-dimensional and recursive drivers of vulnerability in conflict- and climate-affected communities
  • Physical insecurity and conflict
  • Climate stresses and shocks
• Broad development deficits
• Economic and food insecurity
• Weak governance
• Resource scarcity and degradation
• Eroded social networks
• Inequality / asymmetries
• Displacement
Grassroots, cooperative economic development and resilience-building as a **vehicle** for achieving understanding and trust, conflict mitigation alongside sustainable development
Impacts

- Food Security & Livelihoods
- Climate Resilience
- Trust and mutual understanding
- Local conflict resolution
- Planning and policy
